Have a look at Certabo banner if a piece is offset or missing you will been told to reset initial position. If also during the game you drop a piece or misplace one you will be also been told by banner Fix Position. In both cases the column A and H of your Certabo board will automatically light up to attract your attention on that.

• Start playing the banner will tell if it's your turn to move if it's waiting for opponent or if you need to replicate your opponent move on Certabo board once done. Source and Target square leds will light up to show you opponent move. *You do not really need to look at banner*.

• During the game be sure the game tab is always selected

• If the usb cable is disconnected from board at anytime, just plug it in again the Certabo board will be automatically synchronized again and game will continue.
