

YOUR CHESSBOARD DESIGN:

1. TEMPLATE

Check the template! We have three templates for our different chessboard sizes.

The 35mm square, 45mm square and 55mm square. Make sure you work on the template of the chessboard size you selected.

2. ORIENTATION OF THE CHESSBOARD

Check the orientation of the chessboard. Note the bottom side is the default white player side. The A1 and H1 square are clearly marked. **Pay attention the H1 must be the white color one and A1 black for correct orientation of the gaming area.** When we say the white color one we intend the white color of a standard chessboard which determinates the correct side of playing.

3. PDF

In case you will provide the pdf please make sure you embed the fonts in the pdf too.

4. COLOR

The file shall be sent with CMYK (cyan, magenta, yellow, black) to make sure the colors are replicated accordingly.

5. RESOLUTION

The optimal resolution for the printing is 300ppi.

6. FILE TYPE

We accept .pdf or vectorial files or even .ai (adobe illustrator)

7. ABUNDANCE

Make sure the print exceeds the size of the board till the abundance margin (blue edge) in order to avoid a white edge around.

8. TEXT DISTANCE

Keep a minimum distance of 3mm for the text from the printing edge (magenta line).

9. COLOR TRANSPARENCY

Please, note that the only fully opaque color is white, while all the other colors are not completely opaque. Therefore, the grain of the wood can always be more or less visible except in the areas where pure white is selected.

10. COPYRIGHT DESIGN

In case you use proprietary logos and/or other proprietary material, please make sure you have the rights to use the design you upload. By submitting it, you declare you have rights and agree to hold Inventhio Srl harmless from any liability and any third party complaints relating to the graphical work sent. We reserve the right not to proceed in case of well-known: registered trademarks, logos, or copyrighted material in the remote case this could happen.
